

### Wireless, multi-room control from the palm of your hand

Control all your music and all your ZonePlayers from the palm of your hand. Control of your music is not tied to the room where you're listening so you can control what's playing in every room in your house from anywhere in the house.

WIRELESS

EASY & FUN

### Quickly find and play the music you love with touch screen simplicity

When it comes to scrolling through music libraries, searching for songs, viewing album art, choosing zones, and more, the Sonos Controller's touch screen display makes it all incredibly easy...and fun. Just pick a room, pick a song and touch play.

MUSIC CHOICES

### Instant access to endless music

Sonos liberates the music on your computer and the Internet so you can play it all, all over the house. With the touch of a finger you can find and play songs from your personal music library stored on your computer, plus thousands of free Internet radio stations. And Sonos works seamlessly with the most popular music services so you can stream millions of songs and stations from the Internet to the rooms of your choice.

DEDICATED

### 100% dedicated to multi-room music control

The Sonos Controller is focused on one thing and one thing only — controlling your Sonos system. Everything is designed to make choosing your rooms and playing your music super fast and easy. Dedicated Mute, Volume and Zones buttons are shortcuts to the things you do most. The Controller responds instantly — simply pick it up or touch the screen and you're ready to take control. And the high-capacity battery lasts an incredibly long time so you won't have to recharge in the middle of a party.

AUTO UPDATES

### New features and music services with automatic updates

Unlike most other consumer electronic products, the Controller and the entire Sonos system keep getting better even after you buy it. With free automatic software updates you'll always have the newest features and music services to enjoy. Just register your system and Sonos will automatically notify you when software updates are available. Simply touch a button and your system updates itself.

Specification	Description
<b>Display and User Interface</b>	
Screen	3.5 in. (diagonal) color LCD with LED backlighting. 640 x 480 pixels (full VGA resolution)
Touch screen	Capacitive touch screen technology with rugged, scratch-resistant glass face. Find and select music by touching, typing and flicking a finger.

Light sensor	Senses the ambient light in a room and adjusts the button and screen backlights.
Motion sensor	Detects when the Controller is picked-up and automatically wakes it from battery-saving sleep mode.
<b>Power / Connections</b>	
Battery	High density rechargeable 1850mAh Li-ION Polymer battery; User-replaceable through battery door on back of Controller
DC charger	Input 100-240 VAC, 50-60 Hz; Output 5 VDC, 2A
Battery charging time	2 hours to full charge
Battery life	2-5 days (depending on usage pattern and sleep timer settings)
Wireless connectivity*	SonosNet, a secure AES encrypted, peer-to-peer wireless mesh network.
<b>General</b>	
Dimensions (H x W x D)	Controller: 2.9 x 4.5 x 0.7 in. (72.9 x 115.5 x 17 mm) Cradle: 3.2 x 3.0 x 2.4 in. (80.8 x 75.1 x 60.3 mm)
Weight	Controller: 6.7 oz. (190 g) Cradle: 6.0 oz. (170g)
Finish	Rugged glass screen; Anodized precision machined extrusion aluminum case with soft durable rubber backing
Package contents	Sonos Controller 200, Sonos Charging Cradle 200, Sonos Controller Battery 200, AC Adapter and PowerCord, and Product Documentation

## **Wireless, multi-room control from the palm of your hand**

Integrated, multi-room control	Control what music is playing in every room in your house, from anywhere in your house. Controllers aren't tied to a specific ZonePlayer, so you can use any Controller to control the music and the volume in all your rooms. Everything about the Controller – from the touch screen display to the dedicated buttons – is carefully designed to make finding and playing your music a snap.
Multi-room playback options	Wirelessly play the same song in every room of the house – perfectly synchronized. Or, mix it up and play different songs in different rooms.
See what's playing anywhere in your house	The Now Playing screen gives you a detailed view of what's playing, complete with full-color album art, elapsed time of a song and more. Press the Zones button to see an overview of what's playing in each room of the house. Group your zones together or play different songs in different rooms – without interrupting music playback.
Volume control — for every room	Change the volume in one room or many rooms, all from the same screen. If music is playing in multiple rooms, just slide your finger across the screen to set the perfect level in every single room.
SonosNet wireless mesh network	Enjoy the best wireless performance of any networked music product on the market, thanks to SonosNet, our secure AES encrypted wireless mesh network. SonosNet extends the range of the Controller and avoids sources of wireless interference by communicating with the closest ZonePlayer, rather than through one distant access point like most other wireless solutions. The Controller also has multiple antennas to provide great wireless performance.

## **Quickly find and play the music you love with touch screen simplicity**

Get in touch with your music	Scroll through your music library and radio stations with a flick of your finger. View album art while browsing. Play, pause, skip or rewind with a simple touch. All thanks to the high-quality, fast-responding, capacitive glass touch screen.
Search	Instantly find an artist, song, radio station, or radio show by typing on the on-screen keyboard. Matches appear as you type, so you can start playing your music super fast.
Power scroll	Browse through long lists in your music library alphabetically so you can quickly find your favorites.
Display of album art	View full-screen and thumbnail views of album art, smooth animations and rich graphics with the vibrant, 3.5" full-color VGA display (640x480 pixels).
Single library view	Regardless of where your music is stored, Sonos presents a single view of your entire library (all artists, albums, composers, genres, etc). Browse by Artist, Album, Genre, Track Name, Composer, or Playlist.
Queue-based music playback	You can queue-up music to play next while listening to what's playing now – then hand the Controller to someone else to pick the next song.

## Instant access to endless music

Liberate the music on your computer and enjoy it in every room	Sonos can play music stored on up to 16 PCs, Macs or NAS (Network Attached Storage) devices on your home network, supporting the most popular audio formats, including MP3s and iTunes®.
Enjoy computer-free music playback	Get instant access to millions of songs and thousands of radio stations — without ripping, downloading or turning on a computer. Sonos connects directly to these services over the Internet and then streams the music to the rooms of your choice.
Pre-loaded Internet radio stations — free of charge	Sonos includes more than 25,000 radio stations, shows, and podcasts — all for free. And you can tune in without turning on your computer. Browse for stations or type in specific call letters or a radio host you love.
Get endless music from the most popular online music services	Sonos works seamlessly with Last.fm, Napster®, Pandora®, Rhapsody®, SIRIUS® Internet Radio, and downloads from any service offering DRM-free tracks. (Service availability varies by region. <a href="#">Click here to see the music services that work with Sonos in your area.</a> )
Learn about the music that's playing and discover more music	With select music services (Rhapsody and Last.fm), you can get even more detailed music information, like artist bios, album reviews, upcoming concerts, and similar artists. Just touch the information button (i) on your Sonos Controller and discover more music you're sure to love. <i>(Feature only available on the CR200 and Sonos Controller for iPhone).</i>

## 100% dedicated to multi-room music control

Dedicated Mute, Volume, and Zones buttons	Dedicated buttons give you immediate access to the functions you use most. Quickly turn the volume up, down, or mute it all together. Instantly view and control all the zones in your home by pressing the Zones button.
Instant on with movement and touch screen sensors	To listen to music, just pick up the Controller or touch the screen. Sensors automatically wake up the Controller so it's ready to play music whenever you are.
Long battery life	The high-capacity battery eliminates the need to constantly recharge your Controller — perfect for parties.

## Other cool features

Smart, ergonomic design	The extruded aluminum casing has a double-injected rubber backing that makes it feel comfortable in your hand and gives it stability when resting on a table.
Removable battery	Simple to swap out and replace if you ever need a new one.
Charging cradle included	Keeps your Controller all powered up and easy to find — for everyone in the family.
Setup is a snap	Set up your entire system, including music sharing, right from your Controller. Follow the on-screen prompts and touch a few buttons to start playing music all over the house.
Wake up to music	Set the alarm and wake up to your favorite music or Internet radio station in one room, or all over the house. Just hit snooze to get a few minutes more sleep. Fall asleep to soothing music with the sleep timer.
